## Your Trusted Home Remodeler

Greetings!

Old Jack Frost has definitely nipping at our noses in WI and MN! Our professional installation crews have not let Jack Frost stop them though! They have been siding and installing windows all winter!

As the days are getting longer, ideas of spring and warmth start filling our thoughts....as well as home improvement lists. Let the Krumm crew take care of some of that for you! Call us today for a consultation and a free estimate!

## Ice Dam 101

Ice dams are a problem that many WI and MN homeowners face regularly. They are not only difficult to remove, they can be dangerous and destructive. In fact, it's not all that uncommon for a roof to be structurally damaged in some way, such as sagging or even cave-in due to heavy snow and ice buildup on the roof.

Using an axe or an ice pick to remove them can damage your roof even more! Let us help you, we use special steam machines to safely remove your ice dam.

[See our website for our complete blog post about ice dams.](#)
